

Electronics Engineer

H3D, Inc. seeks exceptional problem solvers with expertise in electronics to fill an open full-time position. The new employees will perform sponsored research and product development to solve practical electronics problems related to the field of radiation detection. Required work may be on a government contract requiring US citizenship or Green Card.

Qualifications: We are looking for candidates holding BS, MS, or PhD degrees in Electrical Engineering or related fields, with expertise in circuit design and firmware development.

The candidate should demonstrate the ability to solve hard problems with a focus on practical applications. Printed circuit board schematic development, layout, and troubleshooting are required capabilities. Board complexity could range from a simple power supply to designing a SOM for an ARM CPU. The candidate should also be capable of writing all the necessary drivers, uC code, and firmware required to take advantage of the circuits they develop.

The candidate should work well independently and in a team, and have good communication, organization, and documentation skills. We are looking for someone who is supremely capable, yet not afraid to try and learn new things to push the project forward.

The future hire will be joining a hard-working team that is pushing the limits of available technology to create truly groundbreaking gamma-ray detector systems. Such systems could play an important role in keeping people safe and in national security.

About Us: H3D commercializes CZT-based 3D radiation-imaging technologies for nuclear power plant, defense, homeland security, and medical applications. We seek to provide our customers with the highest performance and most user-friendly instruments possible. A 2011 spinout from the University of Michigan, we have twice been awarded the SPARK FastTrack award for impressive growth and have performed sponsored research for the DoD, DoE, NIH, NIST, and others. We currently ship products to nuclear power plants and research labs around the world.

Please email a cover letter and resume to H3D, Inc. at HR@h3dgamma.com. H3D, Inc. offers an attractive benefit package that includes health insurance, paid holidays and vacation, a competitive 401(k) plan, and pizza or salad once a week. H3D is an equal opportunity employer. All qualified women, minorities, disabled, and veterans are encouraged to apply. Work will occur at our Ann Arbor, Michigan office.
